Stål gör det möjligt

När stål används i avancerade byggnadskonstruktioner ger stålet dig många möjligheter att bygga konstruktion med hög kvalitet. Detta är ett projekt.

Ny terminal Flesland lufthavn, Bergen

Avinor bygger ny flytterminal på Bergen lufthavn, Flesland. Den ska stå färdig medio 2017 och vi samman med dagens terminal ha en kapacitet på in till 10 miljoner passagerare i året. Totalt areal blir ca. 85 000 m². Den nya terminalen blir ett modernt, funktionellt och flexibelt bygg.

...Raskki Construction har genomfört projekteringen och byggnationen av 4000 ton stålkonstruktioner till Fleslands nya flyttaxi. Ekspansjonen är på 100 000 m² i vertikal och horisontell riktning. Till exempel byggs en ny terminal på byggsplan. Till exempel byggs en ny terminal på byggsplan. Till exempel byggs en ny terminal på byggsplan. Till exempel byggs en ny terminal på byggsplan.

DNB Bygg A - vinner av Norsk Stålkonstruksjonspris

Norsk Stålförbund og Norsk Forening for Stålkonstruksjoner og Norsk Stålkonstruksjonspris. Prisen er ment å oppmuntre til opphav til nye idéer og inspirerende løsninger.

Bjørn Malmström, Skanska Building AB

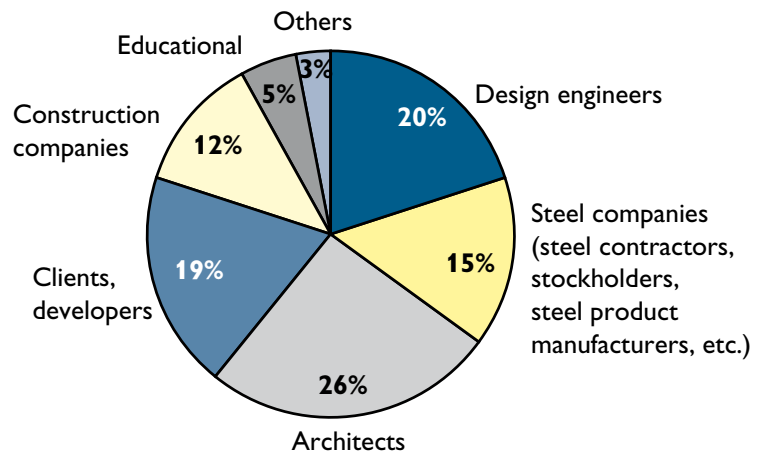

Fästelement och CE-märkning = Kvalitet

Skruvar med tillhörande muttrar, gängstänger, dragstäng och gränslinor är de produkter som binder samman våra stålkonstruktioner. Vi erbjuder hög kvalitet tillsammans med monteringsförfarandet har en avgörande betydelse för säkerhet och hållbarhet. Då bords valit av

The major Steel Construction Magazine in Scandinavia!

The magazine *Stålbyggnad* (Steel Construction) are since several years an important inspiration and knowledge source for steel as a construction material. The magazine reaches out to a wide audience in the construction sector and gives attention to steel as a construction material to clients, architects, design engineers and building contractors. The magazine is also highly regarded among the companies in the steel and steel construction industry as an important channel to spread information and knowledge about their products.

WHO ARE THE READERS OF THE MAGAZINE?

The readers of *Stålbyggnad* are all in one way or another active in steel construction. For example, Design engineers, Architects, Steel Producers, Developers, Contractors, Steel workshops, Stockholders and others. Circulation is now 10 000 copies and approximately 14 000 readers!

The magazine *Stålbyggnad* has its main distribution in Sweden and Norway, where it is available at most engineering and architectural firms, as well as the steel contractors and workshops, developers and others. This magazine reaches out to a large number of readers. The circulation increases continuously from number to number. The magazine *Stålbyggnad* also has readers in other Nordic countries. An advert in *Stålbyggnad* makes your business visible on the entire Nordic steel construction market.

Stålbyggnad will in 2016 be released in four interesting issues. The content is a mix of inspirational project descriptions from steel buildings around the world, and educational articles about the materials, methods and tools, etc. for a better use of steel in constructions.
