

THE SOFTWARE SUITE FOR THE STEEL INDUSTRY

Emiel ter Harmsel  
Sales Manager

# WHAT IS LOGICSTEEL?

*"We create high-end steel processing machines with integrated business software that automates and optimizes your production process – with the best customer service ."*

*"We help companies processing steel to boost throughput , cut waste , and hit delivery targets by replacing complex , manual and siloed systems with a fully integrated , intelligent production platform built specifically for steel."*

Software for steel processing companies

Part of Voortman:  
Software + Machines  
+ Service

Makes production  
smarter, faster, and  
more reliable

## THE SOFTWARE SUITE FOR THE STEEL PROCESSING INDUSTRY

**LogicSteel CADCAM**  
Boost your CAD to CAM process

**LogicSteel PRODUCTIVITY**  
Maximize machine performance

**LogicSteel MRP**  
Take control of your factory

**LogicSteel XR**  
Perform quality inspections at a glance

# THE CAD TO CAM PROCESS

# BEAMNESTING: UNIQUE ADVANTAGES

## Machine-aware nesting

- ✓ Considers clamp zones, miters, etc.
- ✓ Save exactly the right space and nothing more

## Contour nesting

- ✓ Interlocks shapes like puzzle pieces
- ✓ Reduces scrap far beyond block nesting

## Web & flange miters

- ✓ Automatic splitting & correct sorting
- ✓ Eliminates manual prep, speeds workflows

## THE SOFTWARE SUITE FOR THE STEEL PROCESSING INDUSTRY

**LogicSteel CADCAM**  
Boost your CAD to CAM process

**LogicSteel PRODUCTIVITY**  
Maximize machine performance

**LogicSteel MRP**  
Take control of your factory

**LogicSteel XR**  
Perform quality inspections at a glance

# REMOTE MONITORING

## STAY CONNECTED

Connect your Voortman machine to the cloud for secure, online access; anytime, anywhere.

## BENEFITS

- ✓ Monitor production remotely
- ✓ From single machines to full production lines
- ✓ Live machine status and performance data
- ✓ Investigate down-time root causes

## THE SOFTWARE SUITE FOR THE STEEL PROCESSING INDUSTRY

**LogicSteel CADCAM**  
Boost your CAD to CAM process

**LogicSteel PRODUCTIVITY**  
Maximize machine performance

**LogicSteel MRP**  
Take control of your factory

**LogicSteel XR**  
Perform quality inspections at a glance

## THE WORK PREP MODULE

## THE TRACKING MODULE

## THE SOFTWARE SUITE FOR THE STEEL PROCESSING INDUSTRY

**LogicSteel CADCAM**  
Boost your CAD to CAM process

**LogicSteel MRP**  
Take control of your factory

**LogicSteel PRODUCTIVITY**  
Maximize machine performance

**LogicSteel XR**  
Perform quality inspections at a glance

## QUALITY CONTROL AT A GLANCE

LogicSteel XR transforms steel inspections by projecting 3D models directly onto assemblies: no 2D drawings, no manual measurements.

### KEY FEATURES

- 3D Projection
- Precise Overlays
- Paperless Reporting
- All-in-One Device
- Precision at Scale

#### ROI

Customers  
achieve full ROI  
after preventing  
only 3-5 mistakes

# ONE CLOUD BASED SUITE

LogicSteel is a powerful, integrated software suite that stores your data securely in the cloud, eliminating silos and the need for costly servers.

Access data anytime, anywhere

No need for expensive on-site servers

Improved collaboration with centralized data

Enhanced security and reliability

Streamlined workflows across teams and locations

# ONLY PAY FOR IMPACT

## 💡 Unlimited Users

*Everyone on board, all products, no limits*

## 🤝 Seamless Collaboration

*Break barriers, automate workflows effortlessly*

## 💰 Fair Pricing

*Only pay for what delivers real value*

## 📈 Scalable Growth

*From small teams to enterprise, it adapts*

## 🛠️ Flexible Plans

*Tools and pricing that match your needs*
